Teas and tea blends

All herbs are harvested on our farm and its surroundings. The time of harvesting and drying is carefully planned for each plant separately. For this purpose, we made a special dryer. Tea blends we prepare from dried herbs and fill them into filter bags have a unique smell, taste, and color.

The Herbal Paradise of Slovenian Istria

is located in the village of Trsek, which belongs to the municipality of Koper, and the local community of Marezige. There, we are Sonja Kocjančič- Posedi and Urban Posedi, a married couple, created a real herbal-energy paradise.

We are at 298 meters above sea level and our estate belongs under the mountain farm. You have read it well, in the middle of Istria there is a mountain farm. We are currently processing 5 hectares of land on which we have planted various herbs: Helichrysum Italicum, Lavender, Calendula Officinalis, Yarrow, Hypericum Perforatum, Hemp, Mint, some vine plants, and 200 olive trees.

All this is produced and processed in a natural way with the modern installation of steam distillation, which is one of the bigger ones in our country. On this estate, there is also the first living energy labyrinth, which has one **OLIVE TREE** on each side of the sky, and in the middle is the **OAK**. As you know, trees and plants are living beings, so the labyrinth is also alive because it breathes and grows.

Besides this labyrinth, there are 6 energy circuits in which in each round are planted different herbs.

Since our purpose is to bring back to people **NATURE** and **NATURAL PRODUCTS**, we set up a **HERBAL-ENERGY** Learning path, where we are going to present to you exactly what nature offers.

To view the property or visit the energy points, you need to pre-order. This applies to both groups and individuals.

ZELIŠČNI RAJ SLOVENSKE ISTRE

*Everything we need for a healthy life comes from the Nature. We can learn a lot from it if, of course, we want to. Nature does not know anger, envy, revenge, and self-destruction. Nature knows only peace, unconditional love and humility. So let's stop destroying it and start to respect it. A happy man is that **MAN,** who has peace and no restlessness in himself. The abundance of this is offered by **NATURE**. But only if we know how to admire her, if you let it go with the flow and you will get the most beautiful experience from her.*

For you and with you the Herbal Paradise of Slovenian Istria

Poffer of the Herbal Raja of Slovenian Istria

A guided tour of the property with a professional lecture for schools, societies or just individuals.

Steam distillation of our herbs

- Energy labyrinth

The herbs we use for our products

Juniper

Istrian mint

Hemp

Lavander

Laurel

Yarrow

Rosemary

Helichrysum Italicum

Rosa Canina

Hypericum Perforatum

Sage

Bees and bee products

In the Herbal Paradise of Slovenian Istria, we decided to make a complete round so we are in the year 2020 started beekeeping. We were for this purpose building and set up a training apiary where we are gaining experience in beekeeping as self-taught. After all, bees, bumblebees, and other beings are important for our survival. We plant various honey plants to graze bees throughout the year.

In 2022, we will build an apiary in ISTRIA style, which is on the UNESCO list named KAŽUN or KAŽETA where the bees will have their home. The apiary will have a natural climate in the summer will be cold and warm in winter. Bees will be grazed in Paradise of various herbs and grass flowers.
